

# CONTRACT

ANNIEJ  
MARQUEZ  
OLGASH

## GOAL

Our goal as a team is to complete the project in a timely manner with the shared goal of receiving an A.

## WORKLOAD

Our team acknowledges that the workload between members may not be evenly distributed. We hope that each member will put forth the necessary effort to complete their assigned portions and not take advantage of this agreement.

## MEETINGS

Meetings will be done via Google Hangouts or in person.

We do not plan to regularly attend lecture or recitation sections. If we have specific questions, we will attend a section to speak with the staff.

We will assign each person specific tasks to complete between meetings, the results of which can be evaluated upon reconvening. If one person gets stuck with a tough job, just let the other team members know and we will work on it together. Task assignments will be recorded in a shared Google Doc.

## OBSTACLES

Other coursework. As a team, we have agreed to prioritize this project over other problem sets.

Thanksgiving. We will communicate electronically and work individually during break.

Code review. We will make sure that everyone reviews the code at least once.

Different opinions about design, implementation, and specific code. Majority vote will decide what is done.
